EDUCATION

Wilfrid Laurier University

BSc Computer Science

Sept 2020 – June 2024

Waterloo, ON

EXPERIENCE

Mortgage Specialist

MCAP

May 2024 – Present

Waterloo, ON

- Collaborated with the R&A team to develop complex SQL scripts for reporting across multiple CPU teams, handling deployment through SSIS/SSMS and automating scheduled reporting via Visual Studio build jobs.
- Produced thousands of mortgage payout statements monthly with a 100% QA accuracy rating, coordinating with renewals, cash, discharge and other teams based on loan scenario.
- Served as the team's primary resource when a macro needed fixing or adjusting, ensuring all edge cases were accounted for and all requirements were met.

Technical Support Analyst

Transcom

May 2022 - Aug 2022

Milton, ON

- Resolved a high volume of diverse iOS support inquiries spanning account recovery, hardware, app, and billing issues, leveraging internal knowledge bases to troubleshoot complex cases.
- Developed customer-facing troubleshooting documentation and reporting resources for front-end staff, reducing average call handling time for complex inquiries from 12 to 8 minutes.

Data Systems Engineer

Wilfrid Laurier University

Sept 2020 – May 2023

Waterloo, ON

- Built RESTful APIs and backend services using Node.js and SQL in an Agile environment, with builds and deployments managed through Azure DevOps.
- Utilized MongoDB for event metadata storage that did not fit cleanly into SQL tables, enabling flexible and scalable data management.
- Implemented JWT authentication, bcrypt password hashing, and role-based access control with audit logging, aligned with AAA frameworks and OWASP best practices.

PROJECTS

Handoff - AI-Powered Personal Website Builder

JavaScript, TypeScript, Node.js, MongoDB, Jest, Cypress, JMeter, Docker, Postman

Jan 2026 – Present

Personal Project

- Built an AI-powered website builder where users describe their ideal site via the chat box and receive live, editable previews, using Groq (Llama 3.3) for design generation and Tailwind CSS for styling.
- Implemented full-stack architecture on cloud-native serverless infrastructure (Vercel), with MongoDB for persistent user design storage.
- Implemented OAuth 2.0 with nonce validation; built 4-stage shift-left CI/CD pipeline (Jest unit, Cypress E2E, JMeter load testing) via GitHub Actions.

TaskMaster - Task Management App

Next.js, React, TypeScript, Tailwind CSS, Node.js, MongoDB, JWT, Docker, Postman

Jun 2024 – Present

Personal Project

- Built a multi-user REST API by scoping every MongoDB query to the authenticated user's ID, ensuring users can only read or modify their own tasks regardless of what task IDs they request.
- Containerized app and MongoDB with Docker Compose for consistent local and production environments; documented all endpoints in a Postman collection.
- Designed component-based UI with custom React hooks for optimistic state updates, synced against the REST API in real-time.

TECHNICAL SKILLS

- **Languages:** JavaScript, TypeScript, Python, SQL, VBA
- **Backend:** Node.js, Express, REST APIs, MongoDB, MySQL, SSMS, SSIS
- **Frontend:** React, Next.js, HTML, CSS
- **Developer Tools:** Git, Linux, Visual Studio, Azure DevOps, Docker, GitHub Copilot, Claude Code
